Physics, Chemistry, Mathes

- 72.8 %

## WORK EXPERIENCE

### MERN Developer Intern - 6 Month

Madhav Institute Of Technology & Science [🔗](#)

01/2024 - 06/2024

Gwalior, India

Achievements/Tasks

- Developed a Gym Management System using the MERN stack with features such as user authentication and role-based access control to provide secure and personalized experiences. [🔗](#)
- Designed and implemented a responsive frontend using React.js and styled with Tailwind CSS
- It allows users to view exercises for specific muscles through GIFs and YouTube videos, and save their favorite exercises for quick access
- Develop backend with Node.js and Express.js, incorporating RESTful APIs for seamless communication with the database.
- Integrated MongoDB to store and retrieve data efficiently, and deploy web application on netlify and render services

### Workshop

Madhav Institute of Technology & Coding Thinker

08/2024 - 08/2024

Achievements/Tasks

- Completed the JavaScript and React JS workshop at Madhav Institute of Technology [🔗](#)
- Secured first position in the 4th semester of the BCA program at Optimus College Of Higer Studies [🔗](#)

## SKILLS

HTML

CSS

Javascript

Reactjs

Git/Github

Node/Express

Mongodb

Tailwindcss

vscode

Responsive Design

CSS Animations

Restful Api

Bootstrap

Netlify

Render

## PERSONAL PROJECTS

### Movie Hub (03/2023 - 06/2023) [🔗](#)

- Developed Movie Hub, a dynamic movie search app using React.js and TMDB API for real-time movie data. Used Tailwind CSS for a mobile-first, responsive design and React Hooks/Context API for state management. Features include movie/series search, movie details, trending movies, top-rated display, and integrated video trailers

### Ai Assistant (11/2024 - 12/2024) [🔗](#)

- Built an AI assistant using React.js and the Gemini API, featuring functionalities like opening websites, fetching city weather details, providing the current date and time, and conducting Google searches. Enhanced with custom responses for seamless user interaction and utility

### Shop Now (06/2022 - 09/2022) [🔗](#)

- Developed a responsive e-commerce website frontend using HTML, CSS, JavaScript, Flowbite, and Tailwind CSS. The platform features a homepage, detailed product pages (including categories like laptops, mobiles, watches, and collections for men, women, and children), customer reviews, an FAQ section, services information, and a contact page

## ACHIEVEMENTS

Secured first position in the 4th semester of the BCA program (02/2022 - 06/2024) [🔗](#)

GitHub Hacktoberfest 2024 Open Source Contributor (10/2024 - 10/2024) [🔗](#)

Designed and developed responsive portfolio websites for multiple individuals [🔗](#)

Participate In multiple web development workshops [🔗](#)

## CERTIFICATES

HTML, CSS, and JavaScript for Web Developers [🔗](#)

Coursera, Johns Hopkins University

React Basic for Web Developers [🔗](#)

Coursera, Meta

Frontend Web Development Ultimate Guide [🔗](#)

Udemy, Learn Tech Plus
