Summary

Skilled in building responsive web applications with React.js, Tailwind CSS, and the MERN stack. Focused on creating user-friendly interfaces and finding practical solutions. Strong in teamwork, communication, and resilience, with the ability to manage projects, solve problems, and collaborate effectively to deliver quality results.

Experience

MERN Stack Developer (Intern)

Jan 2025 – May 2025 (4 Month)

Praedico Global Research Pvt. Ltd.

Gwalior, India

- Developed the Organization Module with authentication, role-based access control, and a user dashboard with CRUD operations and debouncing.
- Integrated Razorpay Gateway to support secure UPI and card payments.
- Built reusable stats cards and interactive dashboards using Tailwind CSS, Chart.js, and real-time API data.
- Automated daily reports using Node Cron and built a certificate download system post-event completion.

MERN Stack Developer (Part Time)

June 2025 – Dec 2025 (6 Month)

Praedico Global Research Pvt. Ltd.

Gwalior, India

- Developed new components and implemented functionality to enhance features and usability.
- Contributed to bug fixes and minor UI improvements to enhance overall application quality.
- Collaborated with the team using GitHub for version control and workflow management.

Projects

Gym Management System | GitHub Repo | Live Demo

January 2024

- Built a responsive full stack web app using MERN technology to streamline gym operations.
- Integrated ExerciseDB API and Youtube API via Rapid API to display muscle-specific exercises with GIFs and YouTube videos, and allow users to save favorites.
- Added features like member management, gym plans, and feedback submission to enhance overall functionality and user engagement.

Movie Hub | GitHub Repo | Live Demo

September 2023

- Built a dynamic movie search app using React.js and TMDB API for real-time movie and series data.
- Added features like search, movie details, trending and top-rated lists, and embedded video trailers.
- Implemented React Hooks for efficient state management across components.

AI Assistant | GitHub Repo | Live Demo

November 2024

- Built an AI-powered assistant using React.js and the Gemini API with interactive real-time features.
- Enabled actions like opening websites, fetching weather by city, checking date and time, and performing Google searches.
